

SRIA MEMBER CAPABILITY

SRIA Processor Members

Steel Reinforcement in Australia is distributed by an efficient network of specialist reinforcement processors. SRIA Processor Members are established Australian companies responsible for subsequent processing of reinforcing steel supplied by a steel producer in Australia or from overseas which significantly changes the shape and properties of the steel. They are processors of steel reinforcement in Australia, meet recognized technical and quality standards and keep production and financial records. Processors act as the main link between major steel manufacturers and the end user of reinforcing materials. They provide the market with a one-stop processing shop for fabrication of steel reinforcement to AS 3600, AS 5100 and AS 2870 in compliance with the relevant Australian Standard AS/NZS 4671 Steel reinforcing materials. Steel reinforcement is often packaged with a range of complementary products supplied by SRIA Associate Members.

Processor services include:

- reinforcing material scheduling from engineering and architectural drawings
- processing by cutting and bending to the shape required
- welding pre-fabrication of major components
- coordinating and delivering to site as the construction program requires
- providing associated items to assist with the installation on site
- on-site after sales support as required
- quality certification for compliance

For contact details and the capability of the leaders in Steel Processing visit www.sria.com.au

SRIA Associate Members

SRIA Associate Members (Accessories Suppliers, Machinery Suppliers & Steel Mills) are established Australian and International companies who have aims and objectives similar to those of SRIA. They strive for quality and compliance with the relevant standards, maintain quality assurance and implement workplace health and safety. Associate Members service Processor Members through supply of:

- ancillary products providing the end user with a complete solution
- processing equipment
- steel reinforcing feed materials

SRIA Processor Members commonly package in-house a range of Associate Member complementary products for delivery of a complete steel reinforcing solution.

For contact details and the capability of the leaders in Accessories Supply visit www.sria.com.au

Mill Feed Materials

SRIA processors purchase their feed materials from quality Australian and overseas mills. A list of third party accredited mills can be found at www.acrs.net.au

Capability – Tonnage and Footprint

SRIA Processor Members supply steel reinforcement into resource, engineering construction, commercial and residential projects. This comprises both cut and bent reinforcing bar or manufactured reinforcing mesh. SRIA Member companies source, schedule, process and distribute packaged solutions to meet the clients' procurement strategies and project plans.

The SRIA Processor footprint spreads across all states of Australia and the distribution network provides a reliable and efficient just-in-time supply chain. Steel reinforcement traditionally has very short lead times measured in hours to days. Members understand the customer needs and the importance of service and delivery performance on the project construction plan. SRIA Members efficiently control and manage risk in reinforcement supply. Engaging the professional members of the reinforcement supply chain will turn potential risk into opportunity. With early SRIA Processor Member involvement on projects, customers can confidently build in these shorter lead times after the issuing of final construction documentation.

SERVICES SRIA PROVIDES

Publications: Written by experts in design, specification and construction SRIA publications are designed specifically for use by practicing engineers, architects, builders and government. Most are provided free of charge and can be downloaded from the website.

Technical support: A comprehensive technical advice service is available to the construction industry on the design and use of reinforcing steel in concrete. Activities are coordinated from the National Office in Sydney where professional staff respond to technical enquiries. Further specialised support is accessible through a broad network of experts.

Office seminars: SRIA staff regularly visit consulting engineers, specifiers and builders to discuss industry issues, projects and to further develop knowledge on the use of steel reinforcement and construction methods. Free in-house lectures are available on request.

Special research: Recent SRIA research projects include reinforcement bond tests and an extensive testing program for Class L mesh slabs. This important research is bringing the latest information and design requirements to practitioners.

Industry leadership: SRIA staff present technical papers at major national and international conferences on the latest advances in the use of steel-reinforced concrete. Copies of SRIA papers are available free of charge from the website.

Professional development: As part of its commitment to the future of Australia's building industry, the SRIA lectures at universities providing up-to-date design and specification materials free of charge to over 3,000 students every year.

Awarding excellence: The SRIA presents annual Undergraduate Award for Excellence in Reinforced Concrete Design. This is a cash prize for the student who gains the highest mark in the subject in which the SRIA lecture is delivered.

Industry linkage: The SRIA works collaboratively with like associations to develop areas supporting design, education and market development.

Australian Standards: The SRIA is committed to modern easy-to-use design standards for steel-reinforced concrete construction in Australia. The SRIA contributes to all related Australian Standards committees. SRIA staff will assist with queries regarding the interpretation of these standards.

For further information the SRIA can be contacted through its national office:

SRIA REGISTRATION FORM

To keep informed of the most recent industry developments, releases and presentations on steel reinforcement and to maintain your professional development register now for the new SRIA website database. Your details will remain highly confidential and we will ensure your reinforcement knowledge remains up-to-date.

You may register online at
www.sria.com.au/registration.html

or fill out your details below :

Title: Mr Mrs Ms Dr

First name: _____

Last name: _____

Position: _____

Company: _____

Postal address: _____

Phone number (work): _____

Mobile Phone number : _____

Email: _____

and email, fax or post your details to SRIA National Office:

Post: PO Box 418 Roseville NSW 2069

Fax: 02 9499 9471

Email: info@sria.com.au
